## The Necessity of Qi-Healers Without Borders

by Ricardo B. Serrano, R.Ac.

There are three main reasons why the Qi-Healers Without Borders was conceived and put into action. The following monetary, internal and spiritual needs are the main reasons that explain the mission and necessity in utilizing this innovative program which is an integration of Pan Gu/ Sheng Zhen Qigong, Wuji Qigong, Super Brain Yoga, Emotional Freedom Technique (EFT), traditional body and ear acupuncture with Chinese tonic herbs called "*EFT Qi-healers Method*."

### *Monetary needs of clients*

There are lots of time when needy people inquire about the cost of learning the Pan Gu Mystical Qigong and acupuncture treatment only to cancel their appointment when they find out that they have to pay a one-time fee of \$120 which they sadly say they can't afford. With my livelihood as an acupuncturist and Qigong teacher/ practitioner, giving my services for free is not possible. This is where the donations from the charitable organizations and corporate donors are needed to fund the services of Qi-Healers without borders for the needy people who can't afford them.

### *Internal needs of clients*

The most important criteria is whether this form of integrated Qigong modality works or not, and whether this Qigong form is simple but powerful enough to learn and apply. In regards to acupuncture, everybody knows that it works but not everyone is aware of the necessity of including qigong, EFT with acupuncture and Chinese tonic herbs to treat the whole person physically, emotionally, mentally and spiritually to amplify acupuncture's potency a hundred-fold by supplementing the deficient three treasures of Classical Chinese Medicine, the Jing, and "*Shen Qi*" or "*life force*" and removing the obstruction of the physiological function in the organs of the body that cause most of the physical, mental or emotional symptoms of most stress-related diseases.

### *Spiritual needs of both practitioner and client*

Most people are sick because they are empty inside spiritually. If an ill person doesn't fill this need of unconditional love (Sheng Zhen) from the Yuan Qi energy source -- Pan Gu (God source) through Pan Gu Shengong (PGSG), there is continuous chronic symptoms of physical and emotional disorders. When a Qi-healer shares Pan Gu's energy through Qi-healing, EFT with ear or body acupuncture and teaching the moving form of PGSG with a client or group of clients, there is an interexchange of Shen Qi from the universe and among them. When a person experiences overwhelming love, joy and happiness through the practice of PGSG, this is a sure sign of enlightenment (oneness with Spirit) which is the goal of every path of spirituality. Truth can only be known by experience, not by beliefs or thoughts.

**Help is needed and Qi-healers without borders have much to offer!  
Donations from charitable donors are needed to make the mission of QWB a reality!**
